Software Tester – Job Description

Job Title: Software Tester
Experience: 0–2 Years
Employment Type: Full-time
Department: IT Department

Job Summary

We are looking for a detail-oriented **Software Tester / QA Engineer** who will be responsible for testing web and mobile applications, identifying and reporting bugs, validating features, and ensuring that the software meets functional, usability, performance, and quality requirements.

Key Responsibilities

- Perform **functional testing** of web and mobile applications.
- Create **test cases and test scenarios** based on business and technical requirements.
- Perform manual testing across different application modules and features.
- Identify, document, and report bugs with clear and detailed information.
- Coordinate with developers to reproduce, investigate, and verify reported issues.
- Perform **re-testing and regression testing** after bugs are fixed.
- Conduct **UI/UX and cross-browser compatibility testing**.
- Perform **API testing** to validate backend services and API responses.
- Test applications across different devices, browsers, operating systems, and screen sizes.
- Perform **smoke and sanity testing** before production releases.
- Create, manage, and track issues using **Jira** or similar bug-tracking/project-management tools.
- Maintain test results, test documentation, and QA reports.
- Work closely with the development team to ensure the quality and stability of software releases.

Required Skills

Must Have

- Strong understanding of **Software Testing fundamentals**.
- Knowledge of **SDLC and STLC**.
- Practical knowledge of **Manual Testing**.
- Ability to write effective **Test Cases and Test Scenarios**.
- Understanding of the **Bug Life Cycle**.
- Knowledge of **Functional, Regression, Smoke, and Sanity Testing**.
- Understanding of **browser compatibility testing**.
- Basic knowledge of **API Testing**.
- Basic **SQL knowledge**.
- Familiarity with **Jira** or similar issue-tracking tools.
- Good **analytical, troubleshooting, and problem-solving skills**.

Good to Have

- Postman
- Selenium / Playwright / Cypress
- Git / GitHub
- JMeter
- Basic knowledge of JavaScript / Python / Java
- Basic understanding of CI/CD
- Knowledge of Agile / Scrum methodology

Educational Qualification

- B.Tech / B.E. / BCA / MCA / B.Sc. in Computer Science / Information Technology or a related field.
- **Freshers with strong practical knowledge of software testing are also encouraged to apply.**
